ConformEdge Referral Partner Pitch — Mining Sector

One-pager for approaching mining companies, SHEQ officers, and mine safety consultants

---

The Problem They Know

Every mining operation in South Africa faces the same compliance pressure:

- **DMRE inspections** are increasing — Section 54 stoppages cost R500K–R5M per day in lost production
- **MHSA Chapter 2** requires documented risk assessments, incident reporting, and safety committees — most mines still track this on spreadsheets and paper logbooks
- **ISO 45001** is increasingly required by mining houses for contractor pre-qualification
- **COIDA reporting** (W.Cl.2 forms) must be submitted within 7 days — late submissions trigger COID Fund penalties
- Fatality rates in SA mining remain among the highest globally — the DMR is tightening enforcement

The result: SHEQ managers spend 60%+ of their time on paperwork instead of preventing incidents.

What ConformEdge Does (30-Second Version)

ConformEdge is a **cloud-based compliance management platform** built specifically for SA industries. For mining, it covers:

- **MHSA compliance** — 8 chapters, 33 sub-clauses mapped and tracked
- **Incident management** — from near-miss to fatality, with automatic W.Cl.2 generation, SAPS 277 forms, and LTIFR calculations
- **Work permits** — 7 types (confined space, heights, hot work, excavation, electrical, lifting, general) with digital sign-off
- **Equipment register** — calibration tracking, maintenance scheduling, CAPA escalation
- **ISO 45001 + 14001 + 9001** — gap analysis, audit packs, CAPA tracking
- **Mobile app** — works offline on-site, camera for photo evidence, digital signatures

Everything is in one platform. No more spreadsheets, no more lost logbooks, no more late COIDA submissions.

The Referral Opportunity

You don't need to sell or implement anything. Simply refer mining companies to ConformEdge and earn passive income.

What You Do	What Happens
Share your unique referral link	We track the lead automatically
The company signs up and subscribes	You earn commission
They pay monthly/annually	You earn 10% of their subscription for 12 months

Commission Examples

If they subscribe to...	Monthly Fee	Your Annual Commission
Professional (most mining ops)	R5,499/mo	**R6,599/yr**
Business (multi-site operations)	R8,499/mo	**R10,199/yr**

5 referrals × Professional = R32,995/yr in passive income.

Why Mining Companies Will Say Yes

1. **Section 54 risk reduction** — digital compliance trail means audit-ready documentation at all times
2. **COIDA automation** — W.CI.2 forms generated in 30 seconds, not 3 hours
3. **One platform** — replaces 4-5 separate tools (incident logs, permit books, equipment registers, audit spreadsheets)
4. **Mobile-first** — SHEQ officers work underground and on-site, not at desks
5. **Pricing** — starts at R2,299/mo (less than a single day of Section 54 lost production)

Your Talking Points

Opening line:

> *"I came across a compliance platform that handles MHSA, ISO 45001, incident reporting, and COIDA forms — all in one system. It's built for SA mining and construction. Would you be interested in a quick demo?"*

If they push back on cost:

> *"It's R5,499/mo for the Professional tier — that's less than the cost of one day's production stoppage from a Section 54. And it tracks everything the DMR inspector asks for."*

If they already have a system:

> *"What are you using? Most mines I've spoken to use spreadsheets or a combination of 3-4 tools. This replaces all of them with one platform that works offline on mobile."*

How to Get Started

1. Register at: **conformedge.isutech.co.za/referral/register** (takes 2 minutes)
2. We approve your application within 24 hours
3. You receive your unique referral link + self-service dashboard
4. Share the link — we handle the rest

No cost. No commitment. No management required.
